Art Unit: 2835

DETAILED ACTION

Allowable Subject Matter

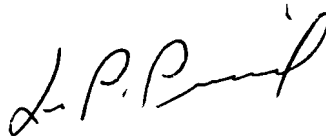

1. Claims 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance: the allowability recites at least in part: a pair of raised side edge portions or raised lateral side edges and that the leather grained layer be disposed between these side edges or side edge portions.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hung Duong whose telephone number is (703) 308-4889.

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-16, 18-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Seto et al. (US Pat. 5,841,630) in view of Andre et al. (US Pat. 5,870,282).

Regarding claims 1-16, 18-20, Seto et al disclose a portable computing device 1 comprising: a housing having top 17 and bottom 2 portions connected by a hinge 28, the top 17 and bottom 2 housing portions having an inwardly facing surface, an outwardly facing surface and a peripheral edge; a set of keys 12 disposed on an inwardly facing surface of the bottom portion 2; a display screen 18 disposed on an inwardly facing surface of the top 17 portion.

Seto et al fail to disclose a leather grain layer disposed on an exterior facing surface of the top portion. However, Andre et al teach a leather grain layer disposed on an exterior facing surface of the top portion (see Delamater column 9, lines 30-34). Therefore, it would be obvious to one of ordinary skill in the art to achieve cosmetic leather grain layer on exterior facing surface to be attractive or unique appearance of the portable computer device.

3. Claims 17 is rejected under 35 U.S.C. 103(a) as being unpatentable over Seto et al. (US Pat. 5,841,630) in view of Andre et al. (US Pat. 5,870,282) and further in view of Ma (US Pat. 5,880,928).

Regarding claim 17, Seto et al and Andre et al disclose all the subject matter of the claimed invention except for computing device comprises a speaker or microphone. However, Andre et al teach computing device comprises a speaker (see Ma column 1, lines 65-67). Therefore, it would be obvious to one of ordinary skill in the art to modify the speaker of Ma into Seto and Andre computing device for convenient communication within the system.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ishida (US Pat. 5,949,565) teaches portable electronic apparatus.

Yates (US Pat. 6,082,683) teaches formable cushion.

Kim et al. (US Pat. 6,101,086) teach portable computer with hand grip.
